Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, April 23, 2020

Cases, Hospitalizations, & Deaths by Race/Ethnicity

The following caveats apply to these data:
1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

Note: COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

1. Staff and residents

Note: This list includes Nursing Homes, Rest Homes, and Skilled Nursing Facilities with at least 2 reported COVID-19 cases to date (staff and residents).
Assisted living residences are not currently included. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified.
Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

1. Staff and residents

Note: This list includes Nursing Homes, Rest Homes, and Skilled Nursing Facilities with at least 2 reported COVID-19 cases to date (staff and residents).
Assisted living residences are not currently included. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified.
Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence
